Reasons for allowance

1. This communication is in response to applicant's 12/10/2008 amendment in the application of Shaffer et al. for a "Time-sensitive-packet jitter and latency minimization on a shared data link" filed 01/27/2004. This application is a continuation of 09/614,536 filed 07/11/2000 is now U.S. Patent #6,707,821. This application is a Request for Continued Examination (RCE) under 37 C.F.R. 1.114 filed on December 10, 2008. The amendment and response has been entered and made of record. The terminal disclaimer filed on 12/14/2007 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 6,707,821 filed 07/11/2000 and issued 03/16/2004 has been reviewed and recorded. Applicant is reminded to submit the recording fee as required for the Terminal Disclaimer. Claims 1, 14, 16-20, 32-51 have been canceled, claims 2, 4-8, 15, 21, 23-25, 31 have been amended, and claims 52-56 have been added. The claims have been amended to better point out and more distinctly claim subject matter comprising the invention.
2. Claims 9, 2-8, 10-13, 15 and 26, 21-25, 27-31, 52-56 are allowable as evident by applicant's amendment (Claims are renumbered as 1-29 respectively).
3. The following is an examiner's statement of reasons for allowance: The closest prior art of record fails to disclose or suggest wherein predicting whether the lower-priority packet can be selected for transmission without causing substantial delay comprises computing the time remaining until the expected arrival of the next time-critical packet and comparing the time

remaining with the estimated transmit time for the lower-priority packet; wherein transmission does not cause substantial delay if the estimated transmit time for the lower-priority packet does not exceed the time remaining until the expected arrival of the next time-critical packet by more than an allowable jitter; wherein computing the time remaining until the expected arrival of the next time-critical packet comprises computing a time estimate $t_R = t_{Np} + k \cdot \sigma_{Np} + j_A - t_C$, where t_{Np} is an expected arrival time estimate for the next time-critical packet, σ_{Np} is an arrival time standard deviation for the next time-critical packet, k is a standard deviation multiplier, j_A is an allowable jitter, and t_C is the current time, as expressly recited in the claims.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Man U. Phan whose telephone number is (571) 272-3149. The examiner can normally be reached Monday through Friday from 6:00 am to 3:00 pm.
